

# T-Cure Bioscience, Inc.

*Curing cancer with personalized T cell therapy*

## Job Openings

T-Cure Bioscience, Inc. is a fast growing start-up biotech company located in Thousand Oaks, CA. Our goal is to develop novel therapeutic agents for cancer immunotherapy. We are pleased to announce two current openings in our R&D team: a scientist position and a research associate position. The specific requirement is the following:

### 1. Scientist:

We are looking for a motivated individual who can work independently. A Ph.D. degree within 3 years of graduation is required. A strong background in molecular and cellular biology is desirable. Postdoctoral research experience in the field of immunology is a plus but not essential.

### 2. Research Associate:

We are looking for a motivated individual with an exceptional organization skill and work ethic. A B.S. degree within 3 years of graduation is required. Basic skills in molecular and cellular biology, such as DNA and RNA preparation, molecular cloning and cell culture, are preferred.

If you are interested, please forward your CV and 3 references to:
